

REMARKS

Reconsideration of this application, as amended, is respectfully requested.

Claims 1-7 are pending in this application. The Office Action rejected Claims 1-7 as follows: Claims 1-3 and 6 were rejected under 35 U.S.C. §103(a) as being unpatentable over Kikinis (U.S. 6,243,596) in view of Tsukamoto et al. (U.S. 5,005,013) and further in view of Lagoni et al. (U.S. 6,141,058); Claims 4, 5 and 7 were rejected under 35 U.S.C. §103(a) as being unpatentable over Kikinis in view of Tsukamoto et al. and further in view of Lagoni et al. and further in view of Hofmann et al. (U.S. 4,427,847); and Claims 1-7 were further rejected as being unpatentable under the judicially created doctrine of obviousness-type double patenting over Claims 1, 6, 8-9 and 11 of Yang (U.S. 6,529,742).

Claims 1, 3, 4, 5, 6 and 7 have been amended. It is respectfully submitted that the amended claims do not present new subject matter.

Claim 1 is the only pending independent claim in this application. Claim 1 has been amended to include subject matter from Claim 4, as well as from intermediate Claim 2. The Office Action had rejected Claim 4 as unpatentable over Kikinis, Tsukamoto et al., Lagoni et al. and Hofmann et al.

The Office Action stated that Lagoni et al. fails to disclose "interrupting a power supply voltage supplied to the TV module and switching from TV mode to the phone mode" (Office Action, page 8). Kikinis and Tsukamoto et al. also fail to disclose such recitation. The Office Action cited Hofmann et al. as allegedly curing this defect:

Hofmann et al. fails to teach interrupting a power supply voltage supplied to the TV module. Rather, Hofmann et al. merely interrupts the audio signal provided to the television speakers when switching from its TV to TP mode. The video signal to the television picture display is not interrupted (see items 36 and 38 of FIG. 1, and Col. 7, line 59 to Col. 8, line 5).

Accordingly, it is respectfully submitted that none of the cited references, either alone or in combination, disclose or suggest at least the recitation of *interrupting a power supply voltage supplied to the TV module and switching from the TV mode to the phone mode according to a preset incoming call alarm mode when receiving an incoming signal from the MRFU*, as in amended Claim 1.

Without conceding the patentability *per se* of the dependent claims, Claims 2-7 are believed to be patentable at least due to their dependency from Claim 1.

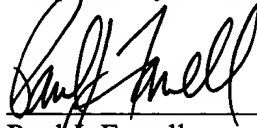

In regard to the rejection under the judicially created doctrine of obviousness-type (i.e. non-statutory) double patenting, the Examiner cited the Yang patent, which is commonly owned by Samsung Electronics Co., Ltd., which is the Assignee of the entire interest in this pending application. Enclosed with this Amendment is a *Terminal Disclaimer*. It is respectfully submitted that the Terminal Disclaimer overcomes the double patenting rejection, and that "filing of a terminal disclaimer to obviate a rejection based on nonstatutory double patenting is not an admission of the propriety of the rejection." MPEP §804.02.II (page 800-32).

Finally, enclosed with the Office Action was a *Notice Of Draftsperson's Patent Drawing Review* (PTO Form 948), which objected to the character of the lines, numbers and letters of the as-filed Figures. 1 and 2. Replacement Drawing Sheets for Figures 1 and 2 are

provided under the enclosed *Submission of Replacement Drawing Sheets*. It is believed that the Replacement Drawing Sheets overcome the Draftperson's objection.

In view of the foregoing, allowance of the pending claims, i.e. Claims 1-7, is earnestly solicited. Should the Examiner believe that a telephone conference or personal interview would facilitate resolution of any remaining matters, the Examiner is requested to contact Applicant's attorney at the number given below.

Respectfully submitted,

Paul J. Farrell
